Set up a Databricks Community Edition Account

(a) Access the Databricks website

<https://databricks.com/try-databricks>

(b) Fill in your information, using **your Salford email** address.

databricks

Try Databricks free

Test-drive the full Databricks platform free for 14 days on your choice of AWS, Microsoft Azure or Google Cloud.

- ✓ Simplify data ingestion and automate ETL
Ingest data from hundreds of sources. Use a simple declarative approach to build data pipelines.
- ✓ Collaborate in your preferred language
Code in Python, R, Scala and SQL with coauthoring, automatic versioning, Git integrations and RBAC.
- ✓ 12x better price/performance than cloud data warehouses
See why over 7,000 customers worldwide rely on Databricks for all their workloads from BI to AI.

(i) Define a password for your account.

(Usually, the password will be saved automatically in your browser for example Google Chrome but **try to take a note or memorize the password**).

A screenshot of a 'Reset Password' form. The form is titled 'Reset Password' in a large, dark font. Below the title, there are two input fields. The first field is labeled 'Please enter your new password: *' and contains the placeholder text 'Password'. The second field is labeled 'Please confirm your new password: *' and contains the placeholder text 'Confirm Password'. Below these fields is a blue button with the text 'Reset password' in white. The entire form is enclosed in a light gray border.

- (k) Now, you are in the Databricks platform. Please **don't click "Upgrade now"**.

If for any reason you made mistake in creating a community account and wrongly proceed to create a 14-day trial account, your student email can no longer be used for the community account, and you must start again with a personal email. Then you should inform us what is your username. **However, do your best to define the account with your university email to avoid any problems in the final assignment.**
